

Reporting Animal Welfare Concerns

Any MGH employee observing a deficiency in animal care or use is encouraged to report it as outlined below. A deficiency may include acts of perceived negligence, omission or non-compliance with approved protocols and IACUC policies, and intentional acts of cruelty towards laboratory animals.

Hospital policy, as well as federal law, prohibits any discriminatory or reprisal measures being taken against any employee for reporting deficiencies in animal care or use.

MGH intends to protect, to the extent possible, the privacy of an individual who in good faith reports an apparent deficiency.
